Barquisimeto, Venezuela · Open to remote and relocation

SUMMARY

Software engineer who ships and measures: co-founded a multi-tenant SaaS in production with a paying customer (100+ active members); built a Claude pipeline scored on a held-out eval (98%, $0.0035/receipt). Claude Certified Developer.

SKILLS

- **Languages & Web:** PHP, Python, TypeScript, JavaScript, SQL, Bash · Laravel, Vue.js, SvelteKit, Inertia.js
- **Backend & Data:** PostgreSQL, MySQL, SQLite, REST APIs, Pydantic, Queues/Background Jobs, Repository Pattern
- **AI/LLM:** Claude, Anthropic SDK, MCP, Tool Use, Structured Outputs, LLM Evals, Prompt-Injection Defense, Claude Code
- **DevOps & Quality:** GitHub Actions (CI), PHPUnit, pytest, mypy, gitleaks, Nginx, DigitalOcean, Cloudflare

EXPERIENCE

JUEGA EN LINEA Remote
Junior Full-Stack Developer Aug 2026 – Present

- Develop full-stack features for the company's internal software on a 14-engineer team: REST APIs, business logic, role-based permissions and PostgreSQL integration in Laravel, following the Repository Pattern.
- Build responsive SvelteKit interfaces that consume those APIs, with reusable components and consistent error handling; backend changes ship with PHPUnit tests.

TRAINUP · Gym management SaaS Remote
Co-founder & Software Engineer Jun 2026 – Present

- Launched a multi-tenant SaaS (Laravel, Vue 3, Inertia.js, MySQL) to its first paying customer after a 30-day trial; it serves 100+ active members (1,100+ bookings in Sep 2026).
- Built the payments module (4 methods, live USD/VES rates): $4.7K+ tracked since launch, 97% of Sep revenue in-app.
- Built the booking engine with transactional row locking against overbooking; its live occupancy view helped the gym raise peak-hour capacity from 15 to 20 per slot (+33%).
- Led an AI-assisted security audit (Claude Code subagents), fixing 4 critical flaws (e.g. cross-tenant access); 451 tests in CI.
- Built zero-downtime atomic deploys with pre-deploy backups, health-probe checks and auto-rollback (26 test scenarios).

KEYCODE AGENCIA DIGITAL Remote, Mexico
Full-Stack Software Engineer Intern (full-time) Feb 2026 – May 2026

- Co-developed a multi-tenant payroll module (Next.js, TypeScript, Supabase) with PostgreSQL Row-Level Security.

THE LOCTOR FAMILY OF REALTORS® · **Freelance Web Developer & Marketing Specialist** (part-time) Oct 2024 – May 2026

PROJECTS

gym-ops-agent · Python, Claude, MCP · github.com/StonishVicer/gym-ops-agent Sep 2026

- Built a Claude Haiku 4.5 vision pipeline turning bank receipts into validated records via forced tool use: 98% all-field accuracy (95% CI 93–99%) on a 100-receipt held-out synthetic set, $0.0035/receipt.
- Designed a leakage-proof eval: holdout run once on a frozen prompt, hash-verified runs, Wilson CIs, failures counted.
- Shipped a read-only MCP server (4 typed tools) and prompt-injection defenses (3/3 caught, 0/97 false alarms); 561 tests.

CERTIFICATIONS

- **Claude Certified Developer – Foundations**, Anthropic · Sep 2026 · Proctored, score 911 (passing 720) · Verify — covers Claude API, agents, MCP, context/prompt engineering, evals, AI app security.
- Claude Code in Action, Anthropic Academy · Mar 2026 · Google AI Essentials, Google · Jul 2026

EDUCATION

Associate Degree in Computer Science (TSU, 3-year program) · Instituto Universitario Jesús Obrero May 2026
